Electro
LED 

FOR LED LIGHTING PRODUCTION
www.electro-led.net

Why LED?

Its simple LED lighting saves your money and is environmentally friendly
ElectroLED recognizes the need to do what we can to preserve the environment.
We offer great products at great prices which consume less energy and last longer than
conventional methods of lighting.

Your construction project will have class, quality and be eco-friendly.
We guarantee all our products with a minimum 2 years warranty.

Who Are We?

ElectroLED is a renowned supplier of indoors and outdoor lighting specializing in architectural and LED solutions.

LED Advantages:

Power Saving
saves up to 85% of power consumption comparing with the traditional lighting. This makes its usage very useful with solar panels.

long lifespan
Led have a lifespan of up to 50000 hours compared to 1500 hours for incandescent bulbs.

Lower Heat Output
Maximum released temperature from LED ARE 45 c rather than 300-400 c that are released from conventional light solutions.

Economical
Led lighting energy costs around 10% of traditional incandescent bulb and around 50% of CFL bulb.

Durability
Since LEDS don't have a filament, they are not damaged under different circumstances. LEDs don't use fragile components such as glass and filaments, that's why they are able to withstand shock, vibration and extreme temperature.

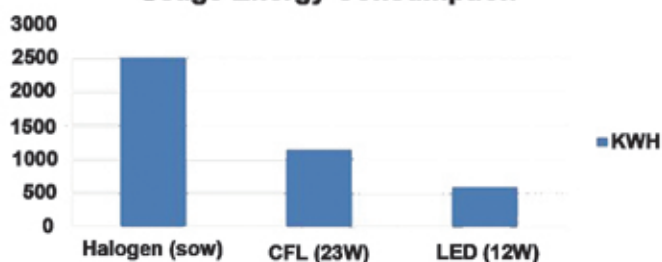

Environmental friendly
LED bulb doesn't contain mercury, it produces very low heat and resides much longer than Other bulb Led bulbs are the most environmental friendly source of light other than natural sun light.

Item	Compared	LED Lighting	CFLs	Incandescent Light
1	PIC			
2	Life Span (average)	50,000 hours	8,000 hours	1,200 hours
3	Lighting Efficiency	70%	40%	10%
4	Watts of electricity used (equivalent to 60 watt bulb)	6 - 8 watts	13-15 watts	60 watts
5	Environmental Impact TOXIC Mercury	NO	Yes	NO
6	Turns on instantly	Yes	No - takes time to warm up	Yes
7	Durability	Very Durable LEDs can handle jarring and bumping	Not Very Durable glass can break easily	Not Very Durable - glass or filament can break easily
8	Light Output (Lumens)	(watts)	(watts)	(watts)
	450	4-5	9-13	40
	800	6-8	13-15	60
	1100	9-13	18-25	75
	1600	16-20	23-30	100
	2600	25-28	30-55	150
9	Sensitivity to temperature	no	yes	some
10	Sensitivity to humidity	no	yes	some
11	Heat Generation	20%	60%	90%
12	Color Temperature	changeable±300 (3000 ,4000, 6000)k	3500	2850
13	dimming Aviability	Yes (0- 100)%	Some	Some

Usage Energy Consumption

all the ways to reach quality

2 year
warranty

The complete satisfaction of the buyer is our highest priority; quality is our way of life. Having full confidence in the quality of Intevision Technology products, we provide a 2-year guarantee and offer the possibility of a 2-year warranty for all our products.

With our commitment to sustainable development, which we call focusing green, we produce products and create environmentally friendly lighting solutions that save energy and provide efficient lighting comfort.

We consciously invest in the development of processes, individual's knowledge, technical equipment and software tools. Through systematic and constant improvements, we build and spread our culture of quality.

Spectral and colorimetric test

In the Ulbricht sphere with a diameter of 2 m, we measure various types of light sources with an emphasis on LEDs. We dedicate special attention to the colour spectrum of the light source, which directly affects the well-being and comfort of the user of the luminaire which is of key importance when planning advanced lighting systems.

Production processes

Intevision Technology products are carefully planned, manufactured and tested. The high standards and reliable quality of our products have been certified by numerous institutions.

IP testing

In the IP laboratory, we measure and improve the level of resistance of lamps to the intrusion of dust particles, water and humidity. Intevision Technology internal testing standards exceed the provisions of the IEC 60529 standard, which ensures the reliable operation of our products under even the most demanding operational conditions.

MQT-LED0515-K1

MQT-LED0410-K1

Heat sink: die cast

Reflector: aluminum anodized

Outer ring: die cast, with glass

Suitable LED sources:

Philips Fortimo LED DLM

Philips Fortimo LED Twistable DLM

Product Characteristics:

1. High Color Rendering Index: 80Ra
 2. Anti-Glare COB LED, Good for eyes
 3. High Efficiency - 90 Lumen per Watt
 4. Low energy consumption: Up to 85% savings comparing with metal halide light
 5. Integrated high efficiency driver
 6. 100% luminosity immediately after powering up
 7. Mercury free and zero UV or IR radiation
 8. Enhanced passive cooling system allows for reduced junction temperature
- , Replace conventional compact cfl bulb and metal halide light

Model	Watt	diameter Φ (mm)	cut-out Φ (mm)	CCT (K)	CRI	Efficiency (lm/w)

0340 Series

Cost and time saving rapid tool-free installation into the ceiling
Highly efficient and glarefree.
substitute for a common 1/2X26W CFL, 1/2X18W CFL, 1/2X13W CFL
downlight with passive cooling technology (lifetime: 50,000 hours at 70% luminous flux remaining) and consistent colour (Ra ≥80)
CREE COB chip with TUV/SAA led driver
Dimming options are available

Materials/Finish

Body: Aluminium
Reflectors: vacuum coating aluminum specular Reflector With PC material
Anti Harm cover: aluminium bezel with a sealed 3mm clear toughened glass diffuser

Installation/Mounting

Tool-free mounting through cut-out.
Suitable for ceiling thicknesses 1-3.5mm.

Specification

A stylish, Recessed LED downlight, luminaire body in aluminium with one-piece vacuum coating aluminum specular PC reflector, not dazzling & soft light.
Rapid tool-free mounting,
Suitable for ceiling thicknesses 1-3.5mm.
CREE COB led chips with TUV/SAA driver
Stable luminous efficacy and CCT thanks to high efficiency of radiator
choice of 3 light colours: 3000K, 4200K, 6500K

Spot light

Features:

COB light source, with high color rendering index and light efficiency, better Light effect, no glare, protect eyes.

- The overall shape design, exquisite appearance, elegant and generous.
- Durable and unique design of heat dissipation to improve lifespan.
- The light source adopts high efficiency, energy saving, long-life high-power LED which can save 70% electricity or more.
- The lamp body is made of aluminum alloy die-casting which can reduce LED junction temperature to ensure that the life extend to more than 40,000 hours.
- Easy installation and maintenance.
- The out-looking is simple and elegant. It can be adjusted according to the needs of the irradiated surfaces and irradiation angles.

0447 Series

Pivots out up to 60°, rotates 0-355°, position lockable
Choice of flood (36°) or spot (15°) reflector, supplied complete with protective glass
CREE COB chip with TUV/SAA led driver
Dimming options are available
Replace for traditional gimbal recessed downlight

Materials/Finish

Body: die-cast aluminium, painted white.
Reflector: high grade anodised aluminium.
Clips: stainless steel spring clip.
Bezel: die-cast aluminium, painted white

Installation/Mounting

Tool-free installation
Retained in ceiling (1-3.5mm thickness) by stainless spring clips.
Can be installed through the cut-out.
All common connectors available to order.

Specification

Pivoting recessed LED downlight instead of 50-100W metal halide lamps downlight.
Luminaire body in die-cast aluminium with one-piece specular anodised high purity aluminium reflector. Rapid tool-free mounting.
Suitable for ceiling thicknesses 1-3.5mm.

Grilled Down Lights

LED grilled lights are newly designed LED lights, and mainly Used for commercial lighting and product display.

Adjustable design, high quality LED light source, spectral pure, rich colors,

- 1- high-quality aluminum housing, and better heat dissipation, live longer
- 2- LED cold light source, no radiation, no heavy metal pollution, performance, color pure, rich, high bright, low flicker, saving much health
- 3- high-grade optical lenses, optical loss, good illumination
- 4- high-power transformers make the perfect combination of the lighting, electrical appliances and light
- 5- Energy and durable (consuming only ordinary incandescent lamp 1 / 10, life is extended more than 100 times.) Ordinary 70W metal halide lamp we put it down to 10W from 70W

Model	watt	Lumen	CRI	Cut out
QL-203-2-40W	2 * 20	3200	< 80 %	165*355mm

0475 Series

Cost and time saving rapid tool-free installation into the ceiling
Highly efficient and glarefree.
Substitute for a common 1/2X26W CFL, 1/2X18W CFL, 1/2X13W CFL downlight with passive cooling technology (lifetime: 50,000 hours at 70% luminous flux remaining) and consistent colour (Ra ≥80)
CREE COB chip with TUV/SAA led driver
Dimming options are available

Materials/Finish

Body: Aluminium
Reflectors: vacuum coating aluminum specular Reflector with PC material
Anti Harm cover: aluminium bezel with a sealed 3mm clear toughened glass diffuser

Installation/Mounting

Tool-free mounting
Fix the lighting fixture directly on the ceiling with ceiling plate.
Suitable for stable ceiling.

Specification

A stylish, surface mounted LED downlight, luminaire body in aluminium with one-piece vacuum coating aluminum specular PC reflector, not dazzling & soft light.
Rapid tool-free mounting.
Suitable for stable ceiling
CREE COB led chips with TUV/SAA driver
Stable luminous efficacy and CCT thanks to high efficiency of radiator
choice of 3 light colours: 3000K, 4200K, 6500K

Electro
LED 
FOR LED LIGHTING PRODUCTION

Surface mounted down light

Features:

COB light source, with high color rendering index and light efficiency, better Light effect, no glare, protect eyes.

- The overall shape design, exquisite appearance, elegant and generous.
- Durable and unique design of heat dissipation to improve lifespan.
- The light source adopts high efficiency, energy saving, long-life high-power LED which can save 70% electricity or more.
- The lamp body is made of aluminum alloy die-casting which can reduce LED junction temperature to ensure that the life extend to more than 40,000 hours.
- Easy installation and maintenance.
- The out-looking is simple and elegant. It can be adjusted according to the needs of the irradiated surfaces and irradiation angles.

Ultra-thin LED panel light

LED 
www.electro-led.com

Housing: Aluminum

Diffuser: PMMA

Mounting: Recessed, surface mounted, suspended.

48 Watt Ultra-Slim LED Panel Light, 4000 lumen, 600mm X 600mm - 220w equivalent

Ultra-thin aluminum alloy LED Panel lights that provide a glare-free, indirect lighting solution. Designed to replace a standard 4 T8 fluorescent fixture

These panels are ideally suited for use in offices, schools, factories, hospitals,

0122-36 20 PHOTOMETRIC TEST REPORT

Main Features:

- LED approximately 50,000 hour life span
- No start-up delay or flickering or buzzing
- Dramatically reduces power consumption
- Completely mercury and lead free
- Non-UV or IR radiation , no heavy metal and harmful gas

LED Panel

MQG-LED-220E

Housing:

0.6mm steel housing under powder coating

Diffuser:

PMMA Opal diffuser specially for LED.

LED type:

LED board with Samsung 5630 SMD, Philips Core LED line, Philips CertaFlux Led Line... etc.

Electrical:

Philips, Osram, Tridonic standard driver for LED line, or optional with dimming system.

Mounting: Recessed

Model	Spec(W)	Total lumen (lm)	CRI	CCT (K)	Fixture size (LxWxH,mm)
MQG-LED-220E	40	3300	>80	3000,4000,6000	596×596×70
MQG-LED-412E	48	4000	>80	3000,4000,6000	596×596×70

Other power and lumen are available on request

Photometry And Drawing

Main Features:

- LED approximately 50,000 hour life span
- No start-up delay or flickering or buzzing
- Dramatically reduces power consumption
- Completely mercury and lead free
- Non-UV or IR radiation , no heavy metal and harmful gas

LED Panel

LED 
www.electro-led.com

MQG-LED-310I

MQG-LED-220I

Housing:

High quality extruded aluminum, anodised or white powder coated (other colors available on request).

Diffuser:

PMMA opal diffuser specially for LED

LED type:

board with Samsung 5630 SMD, Philips Core LED line, Philips CertaFlux Led Line... etc

Electrical:

Philips, Osram, Tridonic standard driver for LED line, or optional with dimming system.

Mounting:

Recessed mounting, housing rests on T-bars with suspension hole available for chain.

Model	Spec.	Total lumen (lm)	CRI	CCT (K)	Fixture size (LxWxH, mm)
MQG-LED-312I	36W(LED)	2900	>80	3000,4000,6000	595x595x50

MQG-LED-224I	48W(LED)	3850	>80	3000,4000,6000	1195x295x50

Photometry And Drawing

Main Features:

- LED approximately 50,000 hour life span
- No start-up delay or flickering or buzzing
- Dramatically reduces power consumption
- Completely mercury and lead free
- Non-UV or IR radiation , no heavy metal and harmful gas

MZJ-LED-220G

Housing: High pure quality extruded aluminum, anodised or white powder coated (other colors available on request)

Diffuser: PMMA

Mounting: Ceiling mounting via internal screws or suspension system with steel wires and height adjustment system.

LED type: Chonon LED line with Samsung 5630 SMD, Philips/ Osram/ Tridonic LED line

Electrical: Philips, Osram, Tridonic standard driver for LED line, or optional with dimming system.

Photometry And Drawing

For LED

Model	spec.	Total lumen (lm)	CRI	CCT (K)	Fixture size (LxWxL mm)	packing size (cm)	qty/ctn
MZJ-LED-220G	40W (LED)	3400	>80	3000,4000,6000	1234 x 290 x 60	127 x 25 x 32	3
MZJ-LED-222G	45W (LED)	3800	>80	3000,4000,6000	1234 x 290 x 60	127 x 25 x 32	3

Other power is available on request. The lumen is subject to change according to different LED strip

Main Features:

- LED approximately 50,000 hour life span
- No start-up delay or flickering or buzzing
- Dramatically reduces power consumption
- Completely mercury and lead free
- Non-UV or IR radiation , no heavy metal and harmful gas

Office Lighting

MZJ-LED-140A

Housing:

High pure quality extruded aluminum, anodised or white powder coated (other colors available on request).

Diffuser: PMMA

Mounting:

Ceiling mounting via internal screws or suspension system with steel wires and height adjustment system.

LED type:

LED board with Samsung 5630 SMD, Philips Core LED line, Philips CertaFlux Led Line... etc.

Electrical:

Philips, Osram, Tridonic standard driver for LED line, or optional with dimming system.

Photometry And Drawing

Main Features:

- LED approximately 50,000 hour life span
- No start-up delay or flickering or buzzing
- Dramatically reduces power consumption

COB LED track spot light

Cob led track spot light 30:

is a new kind of energy-saving lights , green replacement of traditional halogen bulbs used for interior lighting . It helps to keep your electricity expenses down monthly.

The lamp body is made of high- quality aluminum alloy material, with unique air convection design, the heat dissipation performance of the lamp is greatly improved. High efficiency, stable performance and no strobe

Features of cob led track spot light 15 – 20 W:

LED track light Applications:

1. Shopping mall or retailing store, jewelry and clothing display;
2. Museum or art gallery, exhibition hall and other partial lighting;
3. Commercial complex, supermarket, hotel, restaurant, bar, disco, karaoke lighting;

Model	Voltage	power	PF	CRI	Operating temperature	Luminous Efficiency	Luminous Flux	Beam-angle
	90 – 265 VAC	30 watt	≥0.95	Ra ≥ 80	-40~+60°C	80 – 90 Lm/W	2500 : 2700 lumen	30° 45° 60°

Advantages:

- 1- high-quality aluminum housing, and better heat dissipation, light decay less, live longer
- 2- high-grade optical lenses, optical loss, good illumination
- 3- high-power transformers make the perfect combination of the lighting, electrical appliances and light
- 4- lightweight easy, elegant, easy to install and replace
- 5- Streamline design, beautiful appearance
- 6- Energy and durable (consuming only ordinary incandescent lamp 1 / 10, life is extended more than 100 times.) Ordinary 70W metal halide lamp we put it down to 10W from 70W
- 7- shell protects heat, prolonged use of more secure than traditional halogen lamps
- 8- can be directly installed lighting.

Track spot light

0509 Series

Cost and time saving rapid installation.
Highly efficient and glare free.
Substitute for traditional track light with passive cooling technology (lifetime: 50,000 hours at 70% luminous flux remaining) and consistent colour (Ra >80)
CREE COB chip with TUV/SAA led driver
Dimming options are available

Materials/Finish

Body: Aluminium
Reflectors: high grade anodised aluminium.
Anti Harm cover: aluminium bezel with a sealed 3mm clear toughened glass diffuser

Installation/Mounting

Tool-free mounting
Fix the lighting fixture on the ceiling with guide rail(track)
Suitable for stable ceiling.

Specification

A stylish, High-Flux LED track light, luminaire body in aluminium with one-piece high grade anodised aluminium reflector, not dazzling & soft light.
CREE COB led chips with TUV/SAA driver
Stable luminous efficacy and CCT thanks to high efficiency of radiator
Choice of 3 light colours: 3000K, 4200K, 6500K

Substitute for fluorescent waterproof lighting fixtures
(lifetime: 50,000 hours at 70% luminous flux remaining) and consistent colour (Ra >75)
Epistar SMD5630 led chips
IP rate: IP66

Materials/Finish

Body: PC+PC / PC+ABS
Reflectors: MCPCB or High temperature resistant PCB

Installation/Mounting

Tool-free Installation
Fix the lighting fixture onto the ceiling directly.

Specification

The Epistar SMD5630 chips enable a solid-state lighting solution that is more efficient, more reliable and longer-lasting than ever before possible. Stable luminous efficacy and CCT thanks to high efficiency of radiating. Body and diffuser could meet IK08 and 850 degree glow wire test requirement. Lightweight body material, corrosion resistant, Waterproof and dustproof.

It could be fitted with the Microwave sensor, Fitted with the emergency battery to meet requirement. Suitable for supermarket, underground parking, warehouse. Function well in the waterproof and dustproof, Suitable for outdoor and wet locations lighting applications. Choice of 3 light colours: 3000K, 4200K, 6500K

Fix the lighting fixture into the grassland or ground.

Specification

A exquisite&stylish, LED Garden light, luminaire body in Die-casting aluminium with one-pieces vacuum coating aluminum peculiar PC reflector, not dazzling&soft light. Rapid tool-free installation. CREE COB led chips with TUV/SAA driver Stable luminous efficacy and CCT thanks to high efficiency of radiator
Choice of 3 light colours: 3000K, 4200K, 6500K

**Product Datasheet**

Item No	0468 5W	0469 5W
LED Power	5W	5W

FOR LED LIGHTING PRODUCTION

Garden LED

LED 
www.electro-led.com

0478 0479 Series

Cost and time saving rapid tool-free installation.
Highly efficient and glare free.
Substitute for Halogen garden light with passive cooling technology (lifetime: 50,000 hours at 70% luminous flux remaining) and consistent colour (Ra >80)
CREE COB chip with TUV/SAA led driver
IP rate: IP65

Materials/Finish
Body: Die-casting Aluminium
Reflectors: Vacuum coating aluminum specular reflector with PC material
Anti Harm cover: Die-casting aluminium bezel with a sealed 3mm clear toughened glass diffuser
Installation/Mounting
Tool-free Installation
Fix the lighting fixture into the grassland or ground.

LED Up Light

0271 Series

LED 
www.electro-led.com

Cost and time saving rapid tool-free installation. Highly efficient and glare free. Substitute for Halogen underground light (lifetime: 50,000 hours at 70% luminous flux remaining and consistent colour) (Ra >75) Bridgelux Integrated high-power led chips with CE&RoHS led driver IP rate: IP67

Materials/Finish

Body: Stainless Steel & Die-casting Aluminium
Reflectors: high grade anodised aluminium.
Anti Harm cover: Stainless Steel bezel with a sealed 8-10mm clear toughened glass diffuser

Installation/Mounting

Tool-free Installation
Fix the lighting fixture into the holes in grassland or ground

Specification

The Bridgelux Integrated high-power LED chips enable a solid-state lighting solution that is more efficient, more reliable and longer-lasting than ever before possible. Constructed from high-quality die-cast aluminium casing and stainless steel frame that can withstand outdoor conditions. Designed for humid outdoor environments and has undergone rigorous tests to ensure its water resistance. Stable luminous efficacy and CCT thanks to high efficiency of radiator. Choice of 3 light colours: 3000K, 4200K, 6500K

Flood Light & Tunnel light

1. High voltage, low current, energy-saving and environment friendly, healthy and cost efficient
2. One-in-all design, to ensure the salability of products, high grade waterproof and dust proof
3. Adopting optical lens for light source, to gather the light distribution in a range and satisfy different lighting needs
4. Beautiful appearance, made with black tempered glass, making the products look superior and layering
5. Columnar-structured heat radiator to dissipate heat from all directions, which helps solve heat dissipation problems

Description:

1) Unique design lighting Using aluminum alloy and plastic materials body with toughened glass. With good heat sink, waterproof and dustproof with IP65 and high temperature resistant. Low light decay, long lifespan. Plug-in cable, easy maintenance and stable connection, energy saving, power saving over than 75% traditional flood light, It's the best choice of indoor and outdoor lighting.

Applications:

1. Landscaping building, bridge, squares
2. Sports center, tunnel, gardens, subway
3. Underground, factories, clubs, hotels

Specifications:

High bay light

LED 
www.electro-led.com

The LED high bay family is the energy solutions for warehouse, workshop and other industrial and commercial applications. It's easy to retrofit the existing high-pressure mercury high bay and HPS high bay, allows up 65% energy savings.

Product Features :

- Using single powerful LED as the light source, with unique lighting design of Multi-chip integrated single-module; select for excellent imported semiconductor chip, it has high thermal conductivity, low luminous decay, pure colors and no heavy shade etc. .
- The unique design of radiator which can combine with the lamp box perfectly, diffuse the heat conduction efficiently, so that reduce the temperature of inside lamp, it ensures the LED long life-span.
- The surface of radiator is treated by antiseptic and anodic oxidation; with compact structure and aesthetic appearance.
- Environment-friendly, no air pollution, no lead-free, no-mercury

Model	Voltage	power	Lumen	CRI	Ip rate
HB-I-60	110 – 220 volt	60 watt	4800	>75	IP66
HB-I-90	110 – 220 volt	90 watt	7200	>75	IP66
HB-I-120	110 – 220 volt	120 watt	9200	>75	IP66
HB-I-150	110 – 220 volt	150 watt	11600	>75	IP66

-Start without delay and flicker free.
Wide radiation angle, huge lighting area.
High efficiency and power factor LED driver.
Die-casting aluminum casing and high intensity toughened glass cover.
High shock & vibration resistant and ideal heat dissipation design.
Energy saving system, saving 70% energy than the conventional Metal halide lamp, Sodium Light.

Product Detail:

- LED Brand: BRIGELUX
- Lamp efficiency: 92-95LM/W
- Input voltage: AC 85-265V
- Beam angle: 140°X 75°
- Power Factor: >0.96
- Waterproof: IP65
- Color Rendering Index (CRI) : >75

Product Features :

1. More than 70% energy saving
2. All aluminum housing for the heat dissipating greatly is extending the life span of lighting source.
5. Free of dust and water, suitable for outdoor, IP65.
6. High quality power supply, reliable and stable
7. Automatically reduce current against overheating temperature
8. Processed by painting treatment and anodic oxidation, solid and corrosion resisting.
 - The surface of radiator is treated by antiseptic and anodic oxidation; with compact structure and aesthetic appearance.
 - Environment-friendly, no air pollution, no lead-free, no-mercury

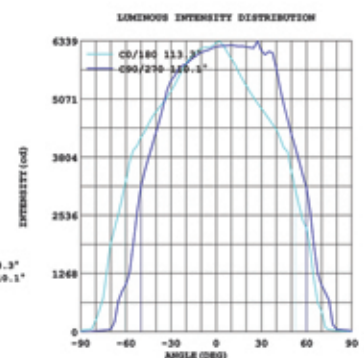

Model	Voltage	power	luminous	CRI	Power factor	Size

Application:

LED Street Light is available for Main Road, Sidewalk, Square, School, Park, Garden, Factory, Residential Places, Villa and many other projector lighting places.

LED Brand:

Candel light

LED 
www.electro-led.com

LED candle lamp, the lamp body is made of aluminum alloy, precision CNC machining, advanced anodizing processing, sophisticated technology, beautiful appearance, excellent performance of heat dissipation.

The light source adopts imported super-bright small power LED chip, color uniform, consistent with IES LM-80 and light energy star standards.

The glass shade matching, good light transmission, light effect is good. A built-in standard constant current driving, advanced circuit design, stable performance long life.

It can replace the traditional incandescent lamp light source.

Applications: Hotel, bazaar, brand chain stores, home furnishing and interior lighting and matching decorative lamps.

FOR LED LIGHTING PRODUCTION

T8 & T5

LED 
www.electro-led.com

Low energy consumption, saves 60% power comparing conventional lights
Equal the florescent tube but with No UV or infra-red radiation, no mercury or ead, eco-friendly, no danger of broken glass
No need for starter and ballasts, instant soft-start, no speckle, no flickering, no humming, no buzzing, no RF interference
High temperature resistant housing for safety
Many sizes available from 60 cm to 120 cm

Bulbs

When you think LED light bulbs, think LED replacement bulbs bring energy savings to a variety of lighting applications for your home. Our wide range of product offerings reduce energy consumption up to 80% compared to incandescent bulbs of the same brightness. Whether it's for your table lamps, chandelier, indoor or outdoor floodlights, we've got LED light bulbs for your home. We have many kind of blubs for calendars and spot lighting and for outdoor fixtures and for outdoor gardens with many varieties of watt power from 3 watt to 25 watt

watt	Length	voltage	Base	Chip	Power factor	Color temperature	Lumen	CRI
